

How to dispose of it

As of January 1, 2023, the mandatory environmental labeling for packaging will come into force, as provided for by Art. 219 paragraph 5 of Legislative Decree no. 152/2006.

- It will be necessary to indicate the alpha-numeric code required by Decision 97/129/EC (<https://eur-lex.europa.eu/legal-content/IT/TXT/?uri=celex%3A31997D0129>) on all packaging (primary, secondary, and tertiary) to identify the materials they are made of;
- Packaging intended for consumers must also feature appropriate wording to guide them in subsequent separate waste collection;
- All packaging must be labeled in the form and manner that the client company deems most suitable and effective to achieve the goal, while complying in any case with the guidelines defined by the Ministry of Ecological Transition.

If you intend to sell or supply your hangers/bags/garment covers and seals to consumers, we invite you to contact us to verify whether the labeling on our products complies with the aforementioned regulation.

If your hangers/bags/garment covers and seals are not intended for consumers, or if implementing such labeling on them involves higher and specific financial burdens, or is technically unfeasible directly on the packaging, the information regarding the composition of the packaging will be provided by us via a specific note attached to the delivery note.

This solution complies with current ministerial guidelines on the matter.

More information on environmental labeling is available at the following link:
